RD

Dear Registry,

I represent Holly Tegan Dahm, the Appellant.

The attached Form F7 is an application commencing an appeal matter under s 604 of the Fair Work Act 2009 (Cth) and relates to original matter C2026/9566.

Please find attached for lodgment today, 27 August 2026:

1. Holly Tegan Dahm's signed Form F7 – Notice of Appeal, including Annexures A–C, appealing Decision [2026] FWC 3088 (PR813237) dated 26 August 2026;
2. the Appellant's Appeal Book, lodged contemporaneously with the Notice of Appeal;
3. the Medical Certificate dated 30 June 2026, provided solely in support of the Appellant's special-assistance and participation request; and
4. the Medical Certificate dated 17 August 2026, provided solely to record the Appellant's continuing current incapacity through 17 November 2026 for the purposes of that request.

The Appeal Book identifies and preserves:

- the Appellant's 24 July 2026 lodgment and service email, signed Form F9 and Attachments 1–7;
- the Respondent's subsequently filed Form F9A and supporting material; and
- the Appellant's 14 August 2026 confirmation of the material relied upon, recording that the Form F9 and Attachments 1–7 were relied upon, that nothing new was lodged or relied upon, and that no further submissions were made.

The Respondent, State of Queensland acting through Queensland Treasury, is copied contemporaneously at humanresources@treasury.qld.gov.au and through its representative, Ms Aimee de Pass of Crown Law, at Aimee.DePass@crownlaw.qld.gov.au. Crown Law's general contact address is also copied.

This email effects contemporaneous provision and service on the Respondent of the Form F7, Appeal Book and accompanying medical material, without prejudice to any separate service of the Form F7 by the Commission.

Appeal Book transcript position

The Appellant does not presently have a transcript of the 14 August 2026 conference.

The Decision records at [3] that, at that conference, the parties agreed that the jurisdictional objections would be determined on the papers on the material already filed. The Appeal Book at pages 160–163 contains the Appellant's contemporaneous confirmation of the papers basis and the material relied upon.

If a transcript or relevant extract of the 14 August 2026 conference is available from the FWC's transcription service provider for the purposes of r 128(4)(c), and the Appellant has not been exempted from that requirement, please advise promptly. The Appellant will obtain and lodge any required supplemented Appeal Book within the applicable r 128 period or otherwise comply with any direction of the Commission.

The two medical certificates are relied upon solely for special-assistance and participation arrangements. They are not relied upon as post-decision evidence establishing Grounds 1–4, do not amend or supplement the appellate case, and do not advance any new merits case.

No adjournment, stay or delay of the appeal is sought by reason of the medical material.

The Appellant requests that:

1. all correspondence, notices and directions be provided by email to both the Appellant and her representative;
2. she participate through her representative, Riki Lee Dahm, and written material; and
3. she not be required to participate orally unless otherwise directed after consideration of the attached medical certificates.

For accuracy of the appeal record, Decision [2026] FWC 3088 records the Appellant's surname as "Damn" at [35] and [42]. Her correct name is Holly Tegan Dahm. Those references are typographical errors in the decision only. No

amendment to the identity of the party is sought.

Please:

1. record the attached Form F7 as the Notice of Appeal;
2. record the attached Appeal Book as lodged contemporaneously with the Notice of Appeal;
3. note contemporaneous provision and service of the Form F7 and Appeal Book on the Respondent by this email;
4. record the Appellant's special-assistance and participation request and the limited purpose for which the two medical certificates are provided;
5. record the Appellant's correct name as Holly Tegan Dahm notwithstanding the typographical references to "Damn" at [35] and [42] of Decision [2026] FWC 3088;
6. send the acknowledgment of lodgment required by r 16(3)(a);
7. advise the appeal matter number when allocated;
8. advise promptly whether any transcript falling within r 128(4)(c) is available and required for the Appeal Book; and
9. identify any lodgment defect or outstanding administrative requirement and the precise action required.

Kind regards,

Riki Lee Dahm

Representative for Holly Tegan Dahm

Appellant
